Bankruptcy filings remained low for the week ending October 24, down by over 18 percent from the same week last year. Chapter 13 filings compared to last year have been trending upward in recent weeks, possibly as a result of increased foreclosure activity.

Compared to the same week two years ago (pre-pandemic), bankruptcy filings are down by about half.

Chapter 7 and Chapter 13 Filing Trends During the Pandemic

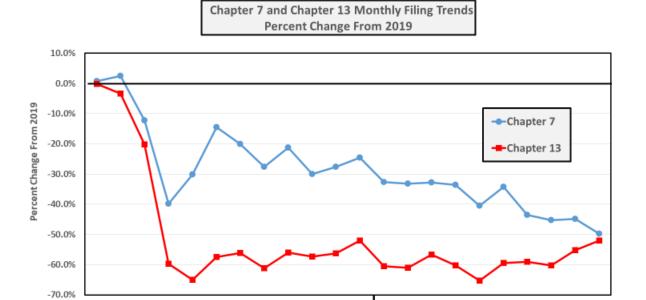

Filings of the two main consumer bankruptcy chapters have had somewhat different trajectories since the onset of the pandemic.

During the first year of the pandemic (April 2020-March 2021), monthly chapter 7 filings were generally down about 20-30 percent from the same month in 2019. In contrast, the declines in chapter 13 filings during the same period were in the 50-60 percent range.

In recent months, chapter 7 filings have continued to decline by 20-30 percent from last year (the early months of the pandemic), while chapter 13 filings are up slightly from this time last year.

The net effect of these monthly patterns is that filings of both chapter 7 and chapter 13 cases are down by about 50 percent since the onset of the pandemic.
